[Stratabound Reports Results of Six More Holes at Captain Copper-Cobalt Deposit](#)

Highlights include:

- Hole 6: 4 metres grading 2.35% copper, 0.05% (1.1 lb/t) cobalt & 0.04% bismuth, plus 11 metres grading 1.1% copper & 0.05% cobalt
- Hole 7: 26 metres grading 1.2% copper & 0.05% cobalt, including 6.5 metres of 2.7% copper, 0.04% cobalt, 0.06% bismuth (1.4 lb/t), 0.5 g/t gold, 13.2 g/t silver
- Hole 8: 13 metres grading 1.6% copper, including 6 metres of 2.7% copper, 0.04% cobalt, 0.06% bismuth, 0.63 g/t gold, 21.3 g/t silver

Calgary, April 24, 2008 - Stratabound Minerals Corp. (TSX.V:SB) is pleased to release assay results from drill holes CP-5 to CP-10 on its 100%-owned Captain copper-cobalt property near Bathurst, New Brunswick. Eighteen holes have been completed to date, and further drill results will be reported when available. The Captain Property is situated 20 kilometres south of the world-class Brunswick No. 12 Mine and ten kilometres east of Heath Steele Mines, a major past producer.

Results from the first four holes were reported in news releases dated, October 12, 2007, December 20, 2007, and January 24, 2008. Results from subsequent drill holes continue to be extremely positive, indicating a potentially economic-grade, near-surface copper-cobalt deposit, with appreciable gold, silver and bismuth values. The deposit is believed to be striking roughly north/south, dipping 60 degrees to the west, and plunging to the south. The mineralization is open along strike, down dip, and down plunge.

Holes 1 to 6 were drilled vertically. Holes 7 to 10 were inclined holes drilled at -45 degrees to test the mineralized horizon from the 50 metre level to surface on Sections 90 N, 75 N, 120 N and 145 N, respectively.

Holes 1, 2, 3 and 5 were drilled along a 40 metre portion of Section 120 N, progressing up-section from west to east, and testing the deposit at depths of 125 to 40 metres below surface. Hole 4 was collared 20 metres south of Hole 1 on Section 100 N at 250 W, testing the 100 metre level. Hole 6 was located on Section 90 N at 220 W, testing below the 40 metre level.

A map showing drill hole locations and a longitudinal section will be posted shortly on the company's website, www.stratabound.com.

Recent copper price is around US\$3.90/lb; cobalt US\$50.00/lb; bismuth US\$16.00/lb; all have been rising steadily in recent months.

*interval 50 m. to 52 m. not sampled

Hole CP-10 which intersected no significant mineralization, was intended to intersect the eastern, up-dip edge of the deposit. Subsequent drilling indicates that folding is present and that CP-10 should have collared further west.

Previously reported highlights include:

- Hole 1: 57.5 metres grading 1.0% copper & 0.05% cobalt, including 7.5 metres of 3.2% copper & 0.07% cobalt

- Hole 2: 47.5 metres grading 1.1% copper & 0.04% cobalt, including 6.5 metres grading 3.7% copper, 0.12% bismuth & 0.07% cobalt
- Hole 3: 58 metres grading 1.2% copper & 0.07% cobalt, including 8.5 metres grading 2.3% copper & 0.10% cobalt and 8.0 metres of 2.3% copper & 0.04% cobalt
- Hole 4: 18.5 metres grading 1.3% copper, plus 13.0 metres grading 1.4% copper & 0.07% cobalt

Drilling was partially funded by a grant awarded to Stratabound by the Province of New Brunswick Deposit Evaluation Program. The exploration at Captain is under the supervision of John Duncan, P.Geo. Drill core is securely stored at Stratabound's core shack facility in Bathurst. Analysis of half core samples was done by SGS Mineral Services in Toronto, Ontario. Stratabound has Quality Control and Quality Assurance protocols in place for drill core that include blank samples, duplicate samples, certified standards and third party check samples.

The technical information contained in this release has been reviewed by John Duncan, P.Geo. and Stan Stricker, P.Geol., Qualified Persons as defined in National Instrument 43-101.

Stratabound is a Canadian junior mining and exploration company currently exploring for precious and base metals in several areas of New Brunswick, in two mineral-rich regions of northern Quebec, and in Ontario.
