### Stratabound options Quebec gold prospect

**CALGARY, ALBERTA, September 7, 2010 – Stratabound Minerals Corp.** is pleased to announce it has optioned a 16-claim (519 hectare) gold prospect in the Gemini Hills area of Berry Township, Québec, near the village of Saint-Gérard-de-Berry, about 90 kilometres north-northwest of Val-d'Or. The property is well located, with easy road access and readily available electricity, water and a skilled local labour pool experienced in all aspects of exploration and mining.

#### Historic Assays

Historic assays from two mineralized outcrops on the property, about 750 metres apart, discovered by local prospectors in 1945 and 1946, are recorded in Quebec Department of Mines (QDM) and Québec Ministère de l'Énergie et des Ressources (QMER) files. Highlights include grab, channel and drillcore samples.

| Sample Type                                | Length (metres) | Gold (g/t) | Length (ft) | Gold (oz/ton) | Reference      |
|--------------------------------------------|-----------------|------------|-------------|---------------|----------------|
| Grab                                       | -               | 13.36      | -           | 0.39          | QDM#GM6252     |
| Grab                                       | -               | 16.10      | -           | 0.47          | QMER#GM42776   |
| Channel                                    | 0.6             | 4.79       | 2.0         | 0.14          | QMER#GM42776   |
| Channel                                    | 1.3             | 7.88       | 4.25        | 0.23          | QMER#GM44706   |
| Channel                                    | 1.7             | 17.47      | 5.5         | 0.51          | QMER#GM42776   |
| Drillcore (best intersection from 9 holes) | 9.44            | 7.88       | 31.0        | 0.23          | QMER#32D16-003 |

These results are from exploration programs undertaken prior to the implementation of National Instrument 43-101, which neither the Company nor its Qualified Person can verify; however the Company believes they are both reliable and material.

There are numerous other gold occurrences within five kilometres of the Gemini Hills property. All known gold showings on the property and in the area occur in shears, dikes and quartz veins at or near the contact of a syenite stock that intrudes a belt of Archean-age volcanic and conglomeratic sedimentary rocks reminiscent of the Kirkland Lake, Ontario gold camp. The property covers a 4.5 kilometre portion of the favourable contact, adjacent to ground held by Agnico-Eagle.

The Gemini Hills claims have been explored sporadically by several individuals and companies since the 1945 prospecting discovery, with no work done since 1997. Previous exploration consisted mostly of re-sampling the known showings, and magnetic and electromagnetic geophysical surveys. Limited drilling has been done to date, with most of the geophysical targets remaining untested. Geochemical surveying has never been attempted.

An exploration program is underway on the property, beginning with linecutting and prospecting.

## Terms of Agreement

Stratabound can acquire a 100% interest in the claims, subject to a 1.5% net smelter return royalty on any production. Purchase price is 50,000 Stratabound shares payable immediately at a deemed price of \$0.08 per share, plus 50,000 shares payable on or before August 3, 2011 at a deemed price of then-current market price less allowable discount, subject to regulatory approval. Stratabound can purchase half the royalty at any time for \$1,000,000. An exploration program budgeted at \$75,000 to \$100,000 is to be performed during 2010, managed by GFE Forestry and Exploration Services with the assistance of Marc Boivin, P.Geol.

The technical information contained in this release has been reviewed by Stan Stricker, P.Geol., a Qualified Person as defined in National Instrument 43-101.

## About Stratabound Minerals Corp.

Stratabound is a Canadian natural resource company exploring and developing gold and base metal properties in eastern Canada. It is currently focused on building a resource base in the infrastructure-rich Bathurst Mining District of northern New Brunswick. **Three world-class base metal mines occur within a 20 kilometre radius of Stratabound's Captain/CNE and Taylor Brook properties, namely Brunswick No. 12, Brunswick No. 6, and Heath Steele.**
