

Stratabound Announces Continuation of Option Agreements for the Golden Culvert Project, Yukon Territory and Settlement of Certain Liabilities

September 28, 2018 – Toronto, Ontario: Stratabound Minerals Corp. (TSXV: SB) (“Stratabound” or “the Company”) is pleased to announce that the Company has made the required payments of cash and shares to continue the Golden Culvert and Little Hyland options through September 27, 2019. Per the terms of the option agreements, Stratabound has paid the Optionors a total of \$80,000 in cash and 1,355,934 common shares of Stratabound.

The Company has also taken actions to reduce its debt obligations. First, the Company has converted one of its notes to Bellport Resources Ltd. into shares by making an election provided to Stratabound under the note and issuing 2,400,000 common shares at \$0.05 per share to extinguish the \$120,000 note. The remaining \$130,000 note remains in place and has been extended until June 30, 2019. Additionally, as part of our continuing effort to reduce accounts payable incurred prior to the 2016 reorganization and management changes, Stratabound has agreed to issue 1,386,972 shares to two creditors to settle obligations totaling \$76,283 which dated back as far as 2014, at a deemed price of \$0.055.

All shares issued as described above will be subject to a hold period of four months and one day.

President and CEO, R. Kim Tyler commented, "We are pleased that we have been able to continue the Golden Culvert and Little Hyland options for another year, as we look forward to receiving the results of the drilling we conducted at the property this summer. We have also made significant strides in cleaning up our balance sheet by settling with several of the old creditors, and by exercising our conversion rights with respect to the Bellport note."

About the Golden Culvert and Little Hyland Properties

Golden Culvert and Little Hyland cover 83.8 square kilometres in the southeast Yukon Territory across a 24-kilometre strike located approximately 20 kilometres northeast of and parallel to Golden Predator Mining Corp.'s 3 Aces property. Work filed in Yukon mineral claims assessment reports has outlined a northerly trending, 3 kilometre by 250 metre, +30 ppb Au up to 791 ppb Au gold-in-soil anomaly that remains open at both ends. The soil anomaly is centred around partially exposed primary gold-bearing quartz veins grading between 7.7 to 22.8 gpt gold over 1 metre and complimentary gold-bearing quartz vein stockwork within a larger silicified, altered, sulphide and gold-bearing wallrock grading up to 2.27 gpt gold over 0.5 metre.

Prior to this summer's exploration program a total of \$564,400 of work had been done on the Property, including 3,645 soil samples, 48 stream samples, 239 rock samples, 19.4 line-km of ground magnetic survey and 18.5 line-km of VLF survey. This summer's program of \$0.75 million includes the completed trenching and ongoing drilling to further explore the highly mineralized areas of the property.

About Stratabound

Stratabound Minerals Corp. is a Canadian exploration and development company focused on the Yukon Territory and to a lesser extent the Bathurst Mining Camp in New Brunswick. Stratabound management

has a diversified track record of exploration, development and operating successes that will facilitate the development of the Company's exploration projects.
